North Carolina State University, North Carolina A&T State University, U.S. Department of Agriculture, and local governments cooperating Copies of this were printed at a cost of 0.016¢ per copy.

BLACKBERRY PLANTS \$8.00 each

Prime Arkansas Freedom — Thornless, ever-bearing blackberry. Fruits early season and then another crop later in the season on older canes. It is very large with excellent flavor. A great choice for local home gardens. **Prime Arkansas Freedom is self-fertile**

Ouachita Blackberry Plant — The Ouachita blackberry is large, sweet and thornless. It has very upright canes, excellent flavor, and is very prolific. Ripens midseason and their fruiting extends for about five weeks. **Self-fertile**

RASPBERRY PLANTS \$8.00 each

Caroline Red — Produces heavy crops of large raspberries. Excellent flavor. Very vigorous.. June and September harvest. **Self-fertile**

Jewel — Largest, most popular black raspberry variety. It produces excellent yields of superb quality berries. The fruit is glossy black and very large in size, and has a rich raspberry flavor. Excellent choice for use in jams and jellies. Jewel is winter hardy and a very reliable choice. Harvest in September. **Self-fertile**

FIGS \$15.00 each—(Bare Root – gel packed & wrapped)

Celeste Fig Tree — The very sweet flesh has a rich honey flavor and has often been called the “sugar fig”. Produces medium sized figs even in unfavorable weather. Skin is Brownish color with rose flesh. Very widely planted variety. The most cold hardy variety available. This one is an excellent variety for fig preserves and also for dried fruit. **Self-fruiting**

Texas Everbearing — The Texas Ever-Bearing fig produces large brownish to purple high quality fruit with amber flesh. It is also great for making preserves. It fruits continuously for a 60-70 day period from early in the season to the end of summer. Produces a light crop first followed by a heavy second crop. **Self-fruiting**

ASPARAGUS \$15.00 / bundle of 10

Mary Washington — This popular variety is “rust” resistant, easily grown, and produces large and tender shoots. The stalks are succulent, straight dark green tinged with purple. Bundles of 10. Delicious!

ELDERBERRY PLANT PAIRS \$15.00 per pair

Adam — A very popular intensely flavored fruit with rich aroma. Ripens late August. Extremely hardy. Produces soft, dark purple berries that make the best jams, jellies and wines. Produces white blooms in spring followed by a bounty of berries – ready for picking in August. **Requires pollination, provided by “John” in this pair.**

John — Produces huge clusters of large, sweet, purplish-black berries that are wonderful for pies and delicious homemade wines. Pick them by the hundreds in clusters. Hold clusters under the faucet then strip them from the stems by the hundreds with a wet fork for eating, cooking and freezing. Grow in the sun or shade even in wet conditions that would kill even less hardy plants. **Requires pollination, provided by “Adam” in this pair.**

KIWI (Cold Hardy) \$20.00

Anna Kiwi — This is a cold hardy Kiwi that does well in our area. Anna variety produces very sweet and flavorful fruit. It is one of the most popular varieties for home gardeners and commercial growers alike. It is very vigorous and has a very abundant crop. **Your fruiting Kiwi requires a MALE plant (Order separately below).**

Ken's Red Kiwi — The Ken's Kiwi is one of the largest hardy kiwis available, and produces in our area. The fruit is sweet and tasty. The fruit is fairly large and almost cylindrical, tapering to a point. The fruit continues to stay firm and does not bruise easily. **Your fruiting Kiwi requires a MALE plant (Order separately below).**

Male Kiwi Plant — The Male Kiwi is covered with fragrant, bright white flowers in May. This vigorous and easy to grow variety is required to pollinate all female Hardy Kiwi varieties. One male plant can pollinate up to 8 female plants. **This variety does not bear fruit. YOU WILL NEED THIS PLANT FOR THE KIWI VARIETIES SHOWN ABOVE TO PRODUCE.**
